### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Formal Matters***

Claims 24-29 are pending and under consideration.

### ***Response to Amendment***

The objection to the Specification has been obviated by Applicant's amendment and is thus withdrawn.

The rejection of claim 25 under 35 USC 112 second paragraph has been obviated by Applicant's amendment and is thus withdrawn.

New issues are set forth below.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1646

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 28-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 8-11 of U.S. Patent No. 6,709,839. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are drawn to a process for producing a SYK-UBP protein wherein the polypeptide is at least 95% identical to SEQ ID NO: 2. The claims in the '839 patent encompasses, inter alia, a process for a process for producing a SYK-UBP protein wherein the polypeptide is at least 95% identical to SEQ ID NO: 2. The method of claims 8-11 differs from the method claimed in the instant application in that they encompass methods of producing other proteins. The instantly claimed method is an obvious variation of the claim as set forth in the Application which discloses processes for producing a cell cycle protein comprising culturing a host cell under conditions suitable for expression of the cell cycle protein including recovering the cell cycle protein (Specification at Column 2, lines 25-30) wherein the cell cycle protein is defined if the overall sequence identity of the amino acid sequence of FIG. 2 (SEQ ID NO:2) or 4 (SEQ ID NO:4) in some embodiments the sequence identity will be as high as about 95% (Specification at 5, lines 5-11). Applicant is reminded that those portions of the specification which provide support for the patent claims may also be examined and considered when addressing the issue of whether a claim in the application defines an obvious variation of an invention claimed in the patent. In re Vogel, 422 F.2d 438, 441-42, 164 USPQ 619, 622 (CCPA 1970), MPEP § 804.

Art Unit: 1646

Thus, the supporting portion of the '839 patent supports the method of producing a SYK-UBP protein wherein the polypeptide is at least 95% identical to SEQ ID NO: 2 herein.

***Claim Rejections - 35 USC § 112 second paragraph***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is dependent on claim 31, which is not a pending claim, therefore the metes and bounds of the claim cannot be determined. Appropriate correction is required.

***Conclusion***

Claims 24-27 are allowable.

Claims 28-29 are rejected.

***References***

The Office will no longer be supplying paper copies of U.S. Patents cited in Office Actions. Applicant is advised that the cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site ([www.uspto.gov](http://www.uspto.gov)), from the Office of Public Records and from commercial sources.
